France

#### ART ANDRE - Culture and tradition

Art Andre is a company that offers unique pieces of art furniture to its clients. Its products are made using special techniques and refined decorations coming from old times. Even in the modern times we live in tradition should be present in our homes and souls.

The thing that makes each furniture piece unique is the decoration. It is not usual style decoration,

but an original personal interpretation of some old floral and geometric patterns (Gothic, Renaissance, Baroque) we meet in other countries in other times.

Rooms furnished with this kind of furniture whether they are in villas, apartments or holiday houses, restaurants, traditional inns or hotels become a universe itself by the uniqueness, warmth and intimacy they breathe.

**GOVERNMENT OF ROMANIA**  
MINISTRY OF ECONOMY AND COMMERCE

A large, three-dimensional wooden block is positioned in the center of the cover. It is surrounded by a transparent globe with a white grid of latitude and longitude lines. The background is a deep blue with a subtle, lighter blue globe pattern.
